Profile Summary

Results-driven Contract Data Analyst specializing in scoping data requests, cleaning messy complex datasets, and delivering high-impact business intelligence dashboards. Proven ability to step into short-term projects and immediately drive data-driven decision making using Python, Excel, and Tableau. Expert at translating ambiguous business questions into concrete analytical frameworks with zero oversight.

Core Contracting Services

- **Data Processing & Validation:** Engineering custom Python scripts using Pandas and NumPy to ingest, scrub, and structurally validate massive unstructured datasets for absolute accuracy.
- **Business Intelligence (BI):** Designing and deploying executive-facing, solution-oriented Tableau dashboards.
- **Statistical Analysis:** Running advanced regression modeling and descriptive statistics.

Core Competencies

Technical Data Stack: Data Cleaning & Preparation | Exploratory Data Analysis (EDA) | Statistical & Sentiment Analysis

Commercial Integration: Dashboard Design | Business Data Storytelling | Bridging Technical Analysis & Commercial Strategy

Data Analysis Methodology

Define Questions → Collect Data → Clean & Explore (Excel/Python) → Analyse Data (Python/Excel) → Visualise & Share (Tableau/Python)

Selected Contract & Project Deliverables

Independent Data Consultant | Study Group Business Project (Jan 2025 – Feb 2025)

- Analyzed a massive institutional dataset consisting of over 75,000 rows and 20+ columns under a strict short-term timeline.
- Designed and executed Chi-squared testing and linear regression models to isolate concrete variables driving customer enrollment.
- Delivered targeted data insights and strategic recommendations that uncovered key scholarship optimization drivers for leadership.

Research Business Analyst | VentureFusion (May 2018 – Oct 2018)

- Conceptualized and deployed independent analytical frameworks to model platform tokenomics and user incentive structures.
- Synthesized technical findings into comprehensive documentation and published articles to communicate insights to non-technical stakeholders.
