

DIPENDRA LIMBU

DATA ANALYST • BUSINESS INTELLIGENCE

Bhaktapur, Nepal (UTC+5:45) • dklimbuz@hotmail.com • +977 9803594227

[Portfolio](#) • [LinkedIn](#) • [GitHub](#)

PROFILE

Data analyst with an MSc in Economics & Business Administration from Copenhagen Business School, where I specialised in Data in Business, and a distinction-graded LSE Data Analytics certification. I start with what a team needs to know, confirm the data can answer it, and finish with a recommendation. Experience delivering findings directly to client leadership. Seeking remote Data Analyst or Business Intelligence Analyst roles.

TECHNICAL SKILLS

Tools Python (Pandas, NumPy, Scikit-learn) • SQL (PostgreSQL) • R • Tableau • Excel • Jupyter • Git

Methods Chi-square testing • Regression analysis • Customer segmentation (k-means) • Sentiment analysis (NLP) • Dashboard design • Data cleaning & EDA

ANALYTICS PROJECTS

Employer-Sponsored Project — Study Group

LSE Data Analytics Career Accelerator • Jan–Feb 2025

- Briefed by a Study Group director who supplied live institutional data; defined the analytical questions rather than working to a fixed brief.
- Conducted the full exploratory and statistical analysis independently across 71,754 application records and 26 fields.
- Chi-square and regression testing found scholarships strongly associated with enrolment (70.5% vs 6.2% conversion) but with no significant effect on academic progression.
- Co-presented to the client director and defended the methodology in a 15-minute Q&A; recommended allocating scholarship budget by regional conversion rate rather than a uniform global model.

Customer & Advertising Analytics — 2Market

Case study • 2024

- Cleaned and validated 2,213 customer records and analysed \$1.34M of sales in Excel; queried advertising channel effectiveness in PostgreSQL and built two interactive Tableau dashboards.
- Found the largest customer segment was not the most valuable — revenue peaked at the \$70–80k income band and declined above it — and identified Twitter as the strongest advertising channel.

Customer Trends & Loyalty — Turtle Games

Case study • 2024

- Modelled loyalty point accumulation in Python and R: multiple linear regression ($R^2 = 0.83$), k-means segmentation into five customer clusters, and TextBlob sentiment analysis of reviews.
- Diagnosed heteroscedasticity via the Breusch-Pagan test and corrected with robust standard errors; validated cluster count using elbow and silhouette methods.

EXPERIENCE

Independent Equity Research — Nepal Stock Exchange (NEPSE)

2021 – 2023

- Researched and screened listed companies, managing a personal portfolio of short-term positions through the bear market that followed the August 2021 peak near 3,200; judged active trading unviable in a long-only market during a sustained downtrend, which leaves open short-term positions exposed to the decline with no instrument to profit from it, and exited on that basis.

Product Analyst — Dryice Solutions

Aug – Sep 2019 • Kathmandu, Nepal

- Worked with senior management, the project manager and the development team on improvements to in-house IT products; produced concept papers and client-facing presentations.

Business Development Officer — Landmark Education

Jan – Mar 2019 • Kathmandu, Nepal

- Reported to the Managing Director; coordinated marketing across partner agencies and assessed incoming proposals, including sponsorship and technology-adoption decisions.

Research Business Analyst — VentureFusion

May – Oct 2018

- Reported to the COO in a desk-research role; built models and analytical frameworks describing how firms design tokenomics to incentivise users and regulate their platforms, published as a [Medium article](#) for a non-technical audience.

EDUCATION

Period	Qualification & Institution	Honours & Focus
2024 – 2025	Data Analytics Career Accelerator (Level 7) London School of Economics and Political Science (LSE), UK	Graduated with Distinction
2014 – 2016	MSc Economics & Business Administration Copenhagen Business School, Denmark	Strategy, Organisation & Leadership • Minor in Data in Business • CBS Scholarship recipient • Selected for the exclusive talent programme, CBS Career Centre
2012 – 2014	BSc Business Administration & Service Management Copenhagen Business School, Denmark	Graduated in the top 3% of the 2014 class
